2. How should this medicine be used?

① Use it in the morning and evening, 4 capsules each time for five consecutive days. Please follow the doctor's instructions to take the medication on time and complete the course of treatment. Can take your capsules with or without food.

② For patients using nasogastric tubes : Open the 4 capsules and disperse the contents in 40 mL of water. Shake or stir the mixture for 3 minutes. Transfer the mixture to an enteral syringe. Flush the tube with some water. Shake the enteral syringe for one minute then give into the tube. Give the dose within 1 hours of preparing the dispersion. Maximum water volume is 240 mL.

3. Other Medication Precautions

- ① This medicine is not approved for use in patients younger than 18 years old
- ② If you are a woman of childbearing potential, use reliable contraception during treatment and for 4 days after your last dose. If you are male, use birth control while you are taking this medicine and for at least 3 months after your last dose.
- ③ Breastfeeding is not recommended during treatment and for 4 days after your last dose.
- ④ If you have any history of allergies, suffer from any serious diseases or are taking any medicines, please inform your doctor and pharmacist to evaluate the suitability of the medicines.

4. Possible side effects

Diarrhea, nausea, dizziness.

5. What to do if you forget to take your medicine

- ① Within 10 hours from the missed dose, please take the medicine as soon as you remember.
- ② If more than 10 hours have elapsed since the missed dose, please skip the missed dose and take the medicine at the next scheduled time. Do not take double doses.

6. Storage and Stability

- ① Store the medicine in a closed container at room temperature.
- ② Keep away from heat, moisture, and direct light.

※ Please consult your doctor or pharmacist if you have any questions.
